

DALBY

CAPABILITIES OVERVIEW

RPG AUSTRALIA
INTEGRATED STEEL SOLUTIONS

AUSTRALIAN OWNED LEADING
HEAVY STEEL MANUFACTURING AND
INSTALLATION ORGANISATION THAT
SPECIALISES IN THE DELIVERY OF
INTEGRATED STEEL SOLUTIONS.

“ HAVING THIS ‘ONE-STOP-SHOP’ CAPABILITY OFFERS GREAT EFFICIENCY BENEFITS TO CLIENTS AS IT REDUCES THE NEED TO TRANSPORT HEAVY WIDE LOADS OVER THE GREAT DIVIDING RANGE. ”

Our focus is to work in a partnership approach with clients by providing tailored solutions that add sustainable value using an integration of capabilities, capacity and expertise.

With four manufacturing sites across South East Queensland and South Australia, it is our Dalby fabrication facility that has been specifically equipped and resourced to service the burgeoning Mining and Oil & Gas sectors within the Surat, Bowen and Galilee Basins.

ABOUT RPG DALBY

Located on the Warrego Highway, RPG Dalby can deliver turn-key solutions to clients in the Mining and Oil & Gas sector that offer strong capability across the complete value chain including project design, engineering, supply chain inputs, processing, fabrication, surface protection, delivery solutions, onsite assembly and through life support.

RPG Dalby has two purpose built and equipped fabrication sheds, blast and paint facilities, large hardstand and storage areas making it an ideal site for the manufacture and delivery to site of components and equipment for large scale mining and oil & gas projects.

Completed modular components and assemblies can be fabricated, blasted, painted, assembled at one place and then transported to site into the near region. Having this ‘one-stop-shop’ capability offers great efficiency benefits to clients as it reduces the need to transport heavy wide loads over the Great Dividing Range.

DALBY

CAPABILITIES OVERVIEW ■ ■ ■ ■ ■

Being equipped to deliver heavy steel processing and fabrication capabilities, the production and control of components and parts can be undertaken onsite at RPG Dalby using equipment such as Davi Rollers capable of rolling steel plate up to 3,000mm in length and up to 50mm thick. Welding machines and various sub ARC controllers allow RPG Dalby to serial fabricate components into sub-assemblies and large scale complex assemblies.

Complex fitout and assembly of large modules is aided with overhead crane capacity to lift up to 32 tonne as well as a 70 tonne straddle lifter. With expansive laydown and storage areas, high volumes of completed modules can be assembled and stored until such time as they are needed to be transported to site.

Also equipped with state of the art blasting and painting booths – the largest and most sophisticated in the Darling Downs region, RPG Dalby has the capability to undertake the highest quality protective coating solutions.

Both blast and paint booths are fully enclosed and are 40m in length, 8m wide and 6m high to accommodate the largest of assemblies.

RPG Dalby has a workforce that is both significant and flexible in order to directly respond to the most demanding project schedules. With a reputation for delivering the highest quality steel fabrication across the Mining and Infrastructure sectors firmly established within the region, this is now being forged within the Oil & Gas sector. With RPG becoming a preferred supplier with many of the Oil & Gas companies establishing within the region, strong relationships are being built on the basis of producing successful project outcomes.

With a strong commitment to safety, quality and the environment, this is reflected in the way we do business, our products, our service oriented approach and proven safety record. RPG Dalby, as is all our manufacturing sites, is quality certified to ISO9001, compliant with relevant OH&S legislation and operate with safe systems of work. RPG is also adopting an environmentally responsible approach in all its activities and is working towards formal Environmental Management certification.

PAINT ENGINEERING AND SHOP DETAILING
SIGNIFICANT AND FLEXIBLE WORKFORCE
PROJECT ENGINEERING AND DESIGN
EXPANSIVE LAYDOWN AND STORAGE AREAS

DALBY CAPACITY SNAPSHOT

FACILITIES:

TWO FABRICATION SHEDS

BLAST & PAINT BOOTHS

LAND:

71,950SQM

UNDER ROOF:

6,567SQM TOTAL (3,100 SQM & 3,467 SQM)

OVERHEAD CRANES:

17 TOTAL WITH UP TO 32 TONNE CAPACITY

HARDSTAND & STORAGE:

5 ACRES

BLAST & PAINT BOOTHS:

FULLY ENCLOSED, 40M LENGTH, 8M WIDE,
6M HIGH WITH RAIL TRACK
