

Brake pressing & bending solutions for all your steel fabrication needs

RPG Australia offers affordable bending solutions utilising a portfolio of brake pressing machines ranging from 400 tonne to 2700 tonne, which can press both mild and Q&T steel plate to form special sections.

 Premium quality

 High productivity

 Long length capabilities

Quality & Experience

RPG Australia offers a full suite of heavy steel processing capabilities to assist clients by providing an integrated, and one-stop-shop, solution.

RPG's supply chain management capability is also offered, with finished products able to be delivered across Australia, free of burrs and slag.

With a strong commitment to safety, quality and the environment, this is reflective of the way we do business, our products, our service oriented approach and our proven safety record.

Capabilities

- 6 presses
- 400T to 2700T machine capacity
- Length up to 12.2m
- Knife blade and radius tooling to cover most requirements
- Ability to press plate, Q&T plate, aluminum, stainless steel and boiler plate

Computer Aided Drafting (CAD)

We integrate our full suite of capabilities into our in-house Computer Aided Drafting (CAD) expertise.

Having our CAD team under the same roof working with the latest design software technologies enables us to deliver optimum accuracy, faster productivity and superior quality outcomes.

Our CAD team has the expertise to work with clients to ensure we tailor every solution to our clients' needs.

Common Applications

- Mining infrastructure
- Metal artwork
- Mining trays & buckets
- General engineering applications
- Agricultural components
- Transport components
- Defence market
